

## DriveSync for LED Installation Instructions

### Mounting the Device

The unit should be mounted in a dry area away from sources of heat. Mounting the unit near the trim pumps will reduce wiring complications. A paper template is included to assist in drilling the mounting holes. The unit should be mounted with the wires facing either down or to the side. Mounting the enclosure with the wiring facing up could lead to water intrusion and will void the warranty. Any attempt to open the enclosure will also void the warranty.

### Power & Ground Connections

- Connect the RED wire to a 12 Volt power source that can support at least 10 Amps. DriveSync will automatically power down after being idle for one hour and can be connected to a constant 12 Volt power source. Always use the supplied fuse holder and do not connect the unit directly to the battery.
- Connect the BLACK to the engine block or other suitable source of ground. Do not connect to a green bond wire. Trim Sensor Wiring

### Trim Sender Connections

For boats with three-wire trim senders DriveSync is supplied with factory connectors for each drive. DriveSync will be connected in line with the trim sensors and the factory display/indicator (if equipped) functionality will be retained.

1. Locate the trim wires inside the engine compartment where they pass through the transom assembly.
2. Unplug the connector at the end of this wire (if equipped) and plug in the DriveSync wire/connector.

#### Manufacturer Warranty

**THE MANUFACTURER OF THIS PRODUCT HAS PROVIDED YOU, THE END USER AND BUYER WITH A ONE YEAR WARRANTY FOR PRODUCT DEFECTS NOT OTHERWISE CAUSED BY YOU. THIS WARRANTY IS IN LIEU OF ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE NOT EXPRESSLY SET FORTH HEREIN AND IS, IN FACT THE ONLY WARRANTY OFFERED BY THE MANUFACTURER. MANUFACTURER SHALL IN NO WAY BE LIABLE FOR ANY LOSSES, TIME EXPENSES, INCONVENIENCE, OR INCIDENTAL, SPECIAL, PUNITIVE AND/OR CONSEQUENTIAL DAMAGES.
