Adjustable Fuel Pressure Regulator 500 EFI Installation Instructions 620-15528 (Red)

NOTE: These instructions assume you have working knowledge of hand tools, their operation and of the vehicle of which you are working. If you do not feel comfortable with this assumption, it is recommended that you take the parts and vehicle to a qualified facility for the installation of these parts. It is recommended you have access to a factory shop manual for installation. Hardin Marine, Inc. accepts no responsibility for improper or faulty installation of the parts, or for the accuracy or omissions in these instructions.

Check the stock fuel pressure prior to modifications.

Turn off all battery power to engines, or disconnect battery cables.
