

**L.E.D Flushmount Navigation Light  
Port & Starboard 12 volt  
Model# NLRLEDSS , NLGLEDDSS**

## Installation Instructions

1. Refer to A.B.Y.C. Standard A-16, '72 COLREG, and the U.S. Inland Navigation Rules for proper light, location & positioning.
  2. These lights are designed to be mounted on a vertical surface so that the light pattern is unobstructed. Port and starboard side mounts should be mounted vertically and parallel to the boat's centerline as far forward as possible.
  3. Connect 12V power to the red wire and ground to the black wire.
- USCG Approval 33 CFR 183.810
  - USCG-2NM
