SWIVEL RIGGING HOSE KIT
755-1050, 755-1051, 755-1052 & 755-1053
SWIVEL RIGGING THRU HULL
755-1050, 755-1051, 755-1052 & 755-1053

Components Contained in 755-1050 Kit

755-1051 COMES WITH STAINLESS BEZEL.
755-1052 COMES WITH HOSE.
755-1053 COMES WITH STAINLESS BEZEL & HOSE.
INSTRUCTIONS:
1) MAKE SURE PRINTER IS SET AT 100%.
2) POSITION THE THRU HULL AHEAD OF THE ENGINE SO THAT IT ALLOWS FOR SUFFICIENT PLAY IN THE HARNESSES, CABLES AND FUEL LINES BEING ROUTED THROUGH THE RIGGING HOSE. THE RIGGING HOSE SHOULD HAVE LARGE SWEEPING BENDS DURING STEERING.
3) CHOOSE A PATH FOR THE HARNESS'S, CABLES AND FUEL LINES THAT WILL ALLOW THEM TO BE ROUTED AS STRAIGHT AS POSSIBLE TO AVOID SHARP BENDS.
4) THIS RIGGING THRU HULL WILL SWIVEL 12 DEGREES IN A 360 DEGREE PATTERN TO HELP WITH MISALIGNMENT.
5) TAPE TEMPLATE TO THE TRANSOM.
6) USE HOLE SAW FOR THE CENTER 4" HOLE.
7) DRILL (4) 1/8 AS SHOWN.

CHECK YOUR SCALE THIS ABOVE LINE SHOULD MEASURE 3"
SWIVEL RIGGING HOSE KIT
755-1050, 755-1051, 755-1052 & 755-1053

Step 1
- Use previous page template to position drill the required mounting hose for the base.

Step 2
- Use 5200 silicone between base and transom.
- Mount to transom using #10 screws, not supplied in the kit.

Step 3
- Turning counter clockwise, install hose into the swivel.
- Install swivel and hose in the base.
Step 4

- Install o-ring into the base groove.
- Apply 5200 to the outside threads on the base.
- Screw cover onto the base. Tighten till the swivel has a slight drag and the swivel rotates freely.
